## Acoustiblok® AcoustiGrip Tape

### ADHESIVE DETAILS

Face description	0023 white polypropylene TC
Face stock service temp range	-20F to 140F (-29 to 60C)
Adhesive	P1480
Adhesive type	Permanent Acrylic
Loop tack	3.5lb/in
Peel adhesion	5.0lb/in
Sheer	1.0hr
Application temp range	40F to 120F
Service temp range	-20F to 302F

Adhesive description: A high performance acrylic formulated for acid resistance and adhesion to polyolefin's. Adhesive exhibits high initial tack and ultimate adhesion.

### LINER DETAILS (backing paper)

Liner type 150g SC

Liner description: a nominal calliper semi-bleached super calendared craft sheet.

## Acoustiblok® Sound Sealant Caulk

Acoustiblok® Sound Sealant Caulk Acoustiblok® Sound Sealant is a fire-rated caulk with superior acoustical isolation properties, formulated to bond to Acoustiblok® material. All joints and penetrations in Acoustiblok® material must be sealed, to obtain rated sound reduction values. Available in 28 oz and 10 oz tubes.

Sound reduction installations require as airtight of a seal possible. Provides excellent sealing properties and decouples adjacent surfaces, helping to minimize structural sound transmission. Very flexible and maintains its flexibility over time. Specifically formulated to work with the Acoustiblok® Sound Isolation Material.

## FCA10 Fast Cure Industrial Adhesive

FCA10 Fast Cure Industrial Adhesive is not a contact cement - It is waterproof and will bond Acoustiblok® to itself, wood, metal, and most other surfaces. Acoustiblok® must be held in place while curing.

Very fast cure time, varying with temperature and humidity. Due to the unique properties of Acoustiblok®, most adhesives will not maintain a bond to the Acoustiblok®, and the bond may release after a few days depending on the temperature.
